Bunger-Henry Building
Room 419
778 Atlantic Drive, NW
Atlanta, GA 30332

I was born and grew up in Nanjing, China. I obtained my bachelor's degree from Southeast University where my undergraduate research is focused on heterogeneous catalysis for biomass conversion. I am now a fourth-year Ph.D. student co-advised by Dr. Carson Meredith and Dr. Sven Behrens. My Ph.D. research is focused on bubbles and foams. I am working on an advanced froth flotation technique to improve the de-inking process for paper industry.

I will graduate in 2018 and I am actively seeking a full-time position or internship.

Brief Biography

B.E Chemical Engineering
Southeast University, China

Interests: colloids, surface science, bubbles, foams and emulsions

Personal Interests

Singing (Karoake), hiking
